**FUEL-TECH N.V. ANNOUNCES REGISTRATION STATEMENT FOR  
DOMESTICATION NOW EFFECTIVE**

**BATAVIA, Ill., Aug. 17, 2006** -- Fuel-Tech N.V. (Nasdaq: FTEK), a limited liability company incorporated under the laws of the Netherlands Antilles, today announced that the amended Form S-4 Registration Statement filed with the Securities and Exchange Commission (SEC) for the purpose of changing its legal domicile from the Netherlands Antilles to Delaware is now effective and that a Prospectus will be mailed shortly to all shareholders. Fuel Tech anticipates that domestication will officially take effect on September 30, 2006.

The amended Registration Statement can be found on the Fuel Tech website at [www.fueltechnv.com](http://www.fueltechnv.com) under Investor Center/Company Reports or at <http://www.sec.gov>, file number 333-134742.

**About Fuel-Tech N.V.**

Fuel-Tech N.V. is a leading technology company engaged in the worldwide development, commercialization and application of state-of-the-art proprietary technologies for air pollution control, process optimization, and advanced engineering services. These technologies enable customers to produce both energy and processed materials in a cost-effective and environmentally sustainable manner.

The Company's nitrogen oxide (NO<sub>x</sub>) reduction technologies include the NO<sub>x</sub>OUT<sup>®</sup>, NO<sub>x</sub>OUT CASCADE<sup>®</sup>, NO<sub>x</sub>OUT ULTRA<sup>®</sup>, Rich Reagent Injection (RRI) and NO<sub>x</sub>OUT-SCR<sup>®</sup> processes. These technologies have established Fuel Tech as a leader in post-combustion NO<sub>x</sub>

control systems, with installations on over 375 units worldwide, where coal, municipal waste, biomass, and other fuels are utilized.

The Company's FUEL CHEM<sup>®</sup> technology revolves around the unique application of chemicals to improve the efficiency and reliability of combustion units by controlling slagging, fouling, corrosion and opacity. This technology, in the form of a customizable FUEL CHEM program, is being applied to over 80 combustion units burning a wide variety of fuels including coal, heavy oil, biomass, and municipal waste.

Many of Fuel Tech's products and services rely heavily on the Company's exceptional Computational Fluid Dynamics modeling capabilities, which are enhanced by internally developed, high-end visualization software. These capabilities, coupled with the Company's innovative technologies and multi-disciplined team approach, enable Fuel Tech to provide practical solutions to some of our customers' most challenging problems. For more information, visit Fuel-Tech N.V.'s web site at [www.fueltechnv.com](http://www.fueltechnv.com).
